The following three scholarships are offered through the Department of Microbiology. Please see the website of the Division of Natural and Mathematical Sciences (NMS) to download an application and for information on application deadlines. You may also want to check the NMS site for information concerning other scholarships offered through the Division of NMS. Please contact Mette Ibba (ibba.2@osu.edu) for further information concerning the application process.

**Kathleen E. Kendrick Scholarship for Minority Undergraduate Studies in Microbiology**

This scholarship has been established in order to assist minority students in successfully completing their undergraduate studies in Microbiology. Applicants must be registered as a Microbiology Major and as a member of a minority group. Applicants must also have successfully completed Microbiology 4100. Up to two scholarships may be awarded in a given year. Scholarships of $1000* will be awarded based on each individual’s academic achievement as well as the strength of the applicant’s written statement and/or letters of recommendation (see application from NMS website).

*Scholarship amounts may be higher based on funds available in each given year.

**Richard E. Stent Jr. Scholarship for Undergraduate Students Majoring in a Biological Science, preferably in Microbiology**

This scholarship fund was established by a gift from the estate of Richard E. Stent to benefit undergraduate students majoring in a Biological Science, preferably in Microbiology. Applicants must have successfully completed Microbiology 4100. Up to two scholarships may be awarded in a given year. Scholarships of $1000* will be awarded based on each individual’s academic achievement as well as the strengths of the applicant’s written statement and/or letters of recommendation (see application from NMS website).

*Scholarship amounts may be higher based on funds available in each given year.

**Anne H. Baumhofer Scholarship for Female Undergraduate Students Majoring in Microbiology**

This scholarship fund was established by a gift from the estate of Anne H. Baumhofer (B.S. 1957, OSU) to benefit female undergraduate students majoring in Microbiology. Applicants must be registered as Microbiology Majors and have successfully completed Microbiology 4100. Up to two scholarships may be awarded in a given year. Scholarships of $1000 will be awarded based on each individual’s academic achievement as well as the strengths of the applicant’s written statement and/or letters of recommendation (see application from NMS website).

*Scholarship amounts may be higher based on funds available in each given year.
